

# BE THERE ANYWHERE™ VIDEO COLLABORATION

Be There Anywhere™ for  
*Business Conferencing*  
*Customer Meetings*  
*Product Demonstrations*  
*Sales Meetings*  
*Brainstorming Sessions*  
*Distance Learning*  
*Employee Training*

## *rmtMultiView (Component Option)*

The **rmtMultiView** solution is a practical web-based video application, implemented on the Internet that conveniently allows authorized users to meet, see, and hear – anyone, anytime, anywhere with a laptop or desktop computer. (Web cam is required for the participants that want to be seen)

RMT allows authorized users, from multiple places in the world, to securely and simultaneously attend and participate in a MultiView meeting. This solution is a practical approach for a small group of individuals who need to meet up to 5 per session.

## **Benefits of rmtMultiView**

- Reduce travel and expenses
- Differentiate your company via unique communication
- Gain competitive advantage via rapid decision making
- Quick expert knowledge dissemination

## **Features and Advantages of rmtMultiView**

- Use your current laptop or desktop computer – Use what you have today
- Up and running within seconds using your browser
- No client software necessary to use – No software to load
- See all web cam participants with the click of your mouse
- Clear audio - Voice over Internet Protocol enabled
- Instant message chat with all participants
- Personalized communication
- Incredibly cost effective

## **Applications for a MultiView Session**

- Staff meetings for domestic and/or international use
- Personalized Video and Voice over internet enabled Conference Calls
- Provide unique personalized support services for anyone
- Strategize with partners to gain competitive advantages
- Stay close with customers anywhere in the world

## **Unsurpassed video collaboration tools for dramatically improved productivity**

- Extremely intuitive and easy to use browser-based interface
- Delivers live, real-time high resolution video directly to invited users' PC browser window – no end-user software required
- Any users can present, view and collaborate in real time on digital documents such as MSWord files, Excel spreadsheets, PowerPoint presentations and web pages
