

BE THERE ANYWHERE™ REMOTE INSPECTION

Be There Anywhere™ for
Site Management
Corrosion/Condition Evaluation
Parts and Equipment Assessment
Visual Verification
Operations Inspection
Remote Surveillance
Security Monitoring

Be There Anywhere™ for Remote Inspection is a powerful, total, web-based system enabling real-time visual inspection and observation of remote sites equipped with iCam intelligent video cameras. From any Internet-connected PC, authorized personnel can remotely pan, tilt and zoom the iCams at any of your locations, to view live, high-resolution video images at up to 26X magnification.

Cost-effective, customizable and easily scalable to grow with your needs, Be There Anywhere™ for Remote Inspection is the ideal solution for improving productivity, quality and safety for any organization with multiple locations, in virtually any environment.

Easy, Powerful Image Control

- Smart, intuitive, browser-based interface (no user manual required)
- Full remote control of iCam™ intelligent video cameras
- Simple pan (340°), tilt (100°) and zoom (26X) control bars and jog buttons
- User-defined preset buttons for quick auto-aiming of camera on key inspection points
- One-click image centering
- Selectable picture size, image quality, and color or black & white image
- Snapshot with timestamp function to easily copy and paste video stills into documents
